

PHP MySQL User Signup Login System

A login and signup form using HTML, PHP, and MySQL. This form allows users to register and login. All information is stored in a MySQL database. After successful login the user is redirected to their dashboard. I enjoy making software so much! Please, if you see any issues make them known!

Technologies Used

- HTML
- CSS
- JavaScript
- Bootstrap5
- PHP
- MySQL

Files

- *home.php* -- The main page showed after login. Edit your own homepage.
- *index.php* -- The main page showed before login.
- *login.php* -- Login Page.
- *signup.php* -- Signup Page.
- *edit.php* -- Edit your profile.
- *logout.php* -- Logout to the dashboard page.

Features

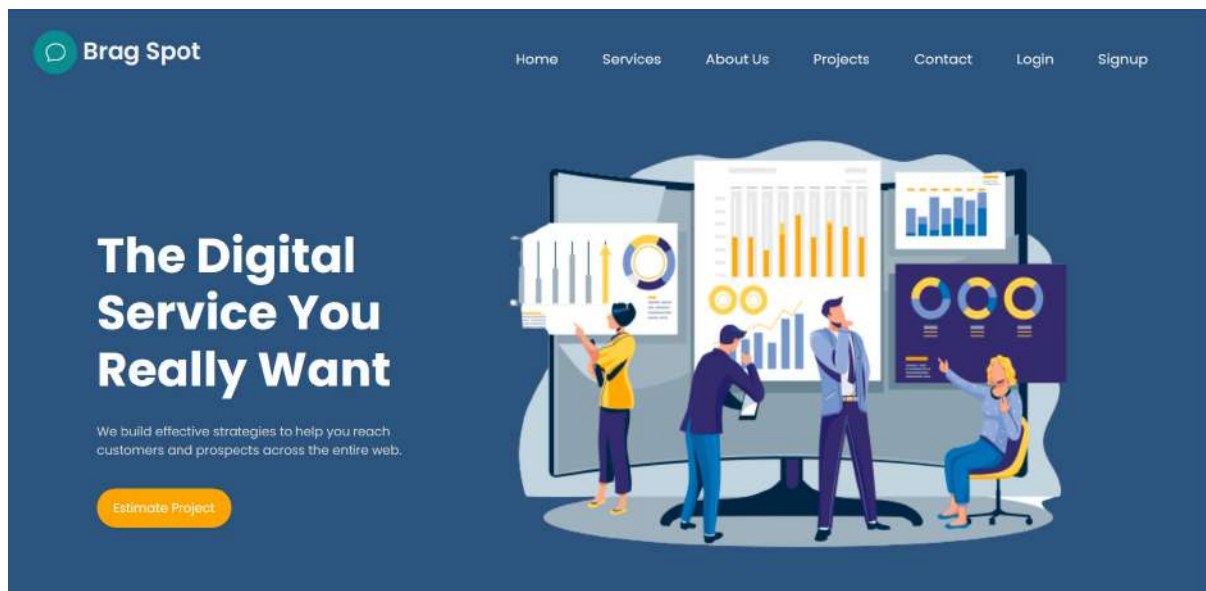

- Stores passwords in DB as hashes
- Easy logout via *logout.php*
- Passwords are hashed and stored (You can't view the original password of the user).
- Username and email validation is done.

How to Use

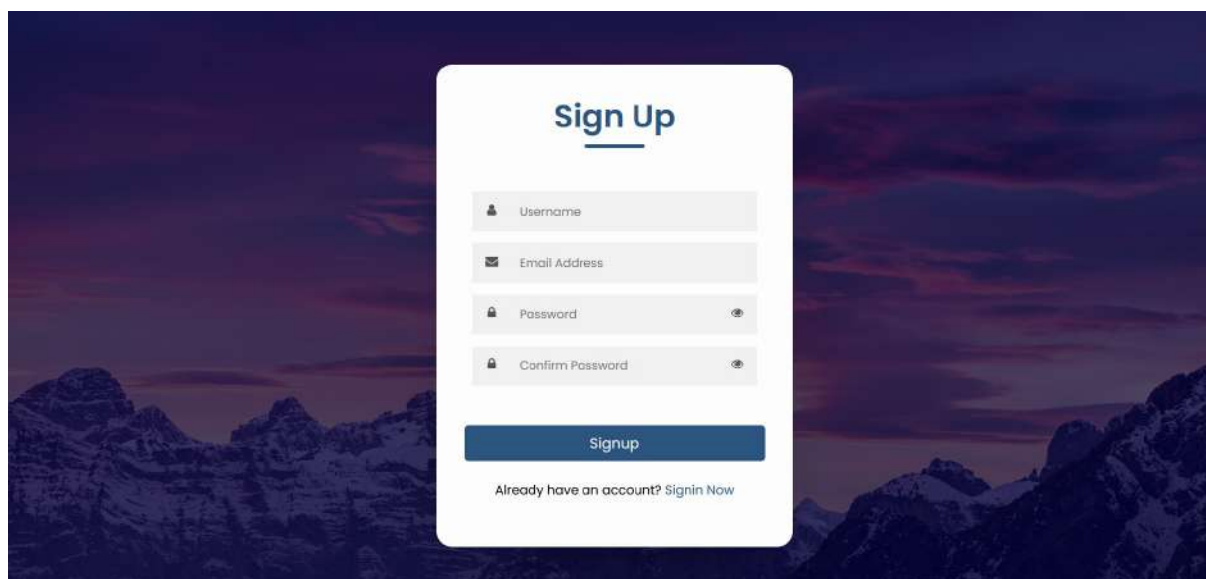

- Download all the source files to your computer.
- Create a DataBase as login in phpMyAdmin.
- Create users table in phpMyAdmin.
- Change the username and password in connection.php file.
- Create four columns id, name, email, password in the users table.
- Or import the [login_system.sql](#) file in the phpMyAdmin.
- Save the files, upload them to your webserver and give it a try.

Preview

Homepage

Signup Page

Signin Page

The login form is centered on a white card against a dark, mountainous background. It features a title, input fields for email and password, a 'Remember me' checkbox, a 'Forgot password' link, a login button, and a link to sign up for new users.
